DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Pritzkau on 2 May 2007.

The application has been amended as follows:

Claims 1-7, 9-21, 23-39 and 44-46 are CANCELLED,

Allowable Subject Matter

1. Claims 67-90 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The prior art of record fails to teach or fairly suggest an apparatus for processing workpieces in a treatment process which generates process related products, said apparatus comprising: a multi-workpiece chamber including at least two processing stations, each of which is configured for exposing one of the workpieces to a treatment process and defining an exhaust port that is at least generally between and equidistant from each of said processing stations and including an exhaust arrangement that is connected to said exhaust port to define an exhaust channel to support an exhaust flow for use in evacuating said chamber; and a partition configuration that is configured to cooperate with said chamber such that the partition configuration is disengagably removable from the chamber and, thereafter, re-engagable with the chamber, and including a baffle portion supported by the partition portion and extending outward from said exhaust port and into said exhaust channel in a way which divides the exhaust flow into at least two exhaust flow portions that leave said multi-workpiece chamber in a way which enhances uniformity of said treatment process for the first and second workpiece stations. Nor does the prior art of record teach a method of providing such an apparatus. In addition, no other prior art

was located that anticipated the invention and/or was properly combinable (i.e. provided the missing teachings along with the requisite motivation for combination).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. 5,639,309 and U.S. Patent No. 6,495,233 to Shmurun et al. disclose multi-workpiece plasma processing chambers with partitions.
